Summary

Senior QA Test Engineer with over 7 years of technical experience in high-growth environments. Expert in executing Automation and Manual Testing, Test Plan Development, and Agile/Scrum methodologies within rapid 2-week Sprint cycles. Proven track record in System Testing and implementing DevOps Methodology to ensure the highest quality across complex Web Client Technologies and enterprise software applications.

Work Experience

AI Quality Assurance Analyst

Current

MARKETEQ DIGITAL

- Working as a AI QA Analyst Intern using tools like Claude, Codex, GitHub CoPilot with VS Code for testing the website.
- Generating testcases after elaborately creating feature files, user stories, acceptance criteria, front end specifications, edge cases, error states and error messages for various services using Claude Cowork tool.

Professional Development/Free Lancing

October 2022 – March 2026

- Updated skills in various technologies like NetSuite, Python, Playwright, Tableau, Power BI and did mini projects from Udemy and Data camp sites.
- Undertook a mini-NetSuite Project at Upwork in 2025 and was responsible for creating saved searches for vendors, customers, accounts and locations and exporting the data in Excel files.
- Developed QA automation code for testing a website using Selenium with Java and BDD Cucumber framework, with the aid of GitHub CoPilot (Claude) and added to GitHub.

Senior Quality Assurance Analyst

February 2022 – September 2022

AMERICAN SOCIETY OF MECHANICAL ENGINEERS (ASME), REMOTE

- Developed robust automated testing frameworks for ASME.org utilizing Selenium, Cucumber, and Java to accelerate software validation within 2-week Sprint cycles.
- Automated 55+ features in a period of 1 month reducing the time of testing by 90%.
- Analyzed User Stories to architect and execute manual test cases in Zephyr Squad, ensuring comprehensive Test Plan Development for high-level requirements.
- Evaluated system enhancements through Smoke, Regression, and End-to-End System Testing for Salesforce application for ASME across QA, UAT, and Production environments both manually and automating the tests through ACCELQ and mapped the fields to the ASME website and tested the migration successfully.
- Logged defects and update the defect ticket status in Jira and collaborated closely with development and business teams throughout the Agile process.
- Implemented DevOps Methodology by building CI/CD pipelines in Azure DevOps Cloud to automate execution of regression suites and shorten the Software Lifecycle Management cycle.
- Validated complex mobile applications using Browser Stack, focusing on Web Client Technologies and cross-platform compatibility.

- Participated in Agile/Scrum rituals, including daily standups, to identify bottlenecks and provide transparent updates on defect fixes and system health.
- Created Sign off reports on completion of Smoke testing.

Junior Quality Assurance Analyst

September 2020 – May 2021

VERISK ANALYTICS, INC, JERSEY CITY, NJ, REMOTE

- Executed Automated Testing scripts in Postman and JMeter for Rest API validation, ensuring consistent performance across Acceptance and UAT environments.
- Analyzed large-scale data sets for Coverage Verifier (CV), APlus Auto, APlus Property and Light Speed Auto to support Software Lifecycle Management and ensure data integrity within complex software applications.
- Collaborated with business stakeholders to translate high-level requirements into technical test cases, managed via Jira ticketing for real-time progress tracking.
- Participated in Agile/Scrum status meetings to evaluate sprint goals and address technical obstacles in a fast-paced development environment.

Senior Faculty/Project Advisor

July 2007 – August 2008

THE OXFORD COLLEGE OF ENGINEERING, BANGALORE, INDIA

- Developed best practices for Unit Testing and code quality in Java and PL-SQL projects, fostering a culture of rigorous software validation.

Faculty/Project Advisor

November 2001 – July 2005

CHRISTIAN COLLEGE OF ENGG. AND TECHNOLOGY, BHILAI, INDIA

- Mentored full-stack projects involving Oracle database design and Visual Basic, emphasizing system-wide testing and architectural integrity.

Education

Master's Degree in Computer Science

National Institute of Technology Tiruchirappalli

Bachelor of Engineering in Computer Science

Faculty of Technology & Engineering

Additional Skills

Quality Assurance & Testing: Manual Testing, Automated Testing, System Testing, Unit Testing, Regression Testing, Smoke Testing, End-to-End Testing, UAT, Test Plan Development

Tools & Platforms: Selenium, Cucumber, Postman, UFT/QTP, JMeter, Playwright, Zephyr Squad, Jira, Azure DevOps, Browser Stack, ACCELQ, IntelliJ

Methodologies & Lifecycle: Agile/Scrum, DevOps Methodology, Software Lifecycle Management, 2-week Sprint cycles, CI/CD Pipelines

AI Tools: GitHub Copilot, Chat GPT, Codex

Technical Stack: Java, Python, SQL, C++, C, HTML, Redshift, MySQL, Oracle, Salesforce

Training

- Completed Salesforce Admin training in Trailhead

Work Authorization

I am on H4 EAD and am able to work for any employer in US without sponsorship.
